# Grape Sorter Scale

*Best combination weighing technology*

- High speed, High accuracy
- Simple Operation
- Data management
- Sanitary design

## Features

### High speed, High accuracy

#### Proprietary weighing technology

Even the body size is much smaller than standard multihead weigher, same software platform is implemented in Grape sorter to achieve accurate and speedy weighing solutions.

### Simple Operation

#### High mobility, Easy setup

Grape Sorter Series is the lightest Sansui weigher. Just two operator can carry and place it. You can start operation just connecting power plug. No air supply is needed.

#### Intuitive operation order with bright LEDs

Bright color LEDs clearly indicate operation order for reducing human error.

### Data management

#### Memory card

All production data and setting data can be stored on the memory card as easy handling data format on standard PC.

### Sanitary design

#### No tools are required to remove scale pans

All scales pans can be removed without any tools.

#### Washable main body (IP66)

IP66 waterproof Main body allows hosedown washing. Flat scale top offers easy to wipe, prevent dust remains.

## Principal of weighing

### Only 3 steps

1. **Placing products**  
Placing the product on the vacant scale pans.
2. **Combination calculation**  
The closet combination to the target weight and target count is selected.
2. **Pick and pack**  
Operator picks products indicated by LED lamps, and pack them.
